

STEM JOBS: LIFE OR DEATH?

**THE NUCLEAR
WEAPONS INDUSTRY
WANTS YOU.**

Sure, you could make bank at General Dynamics, Leidos, Lockheed Martin, Northrop Grumman, L3 Harris, RTX/Raytheon, or other companies that make nuclear weapons of mass extinction. Unfortunately, "deterrence" is a flawed theory. Nuclear weapons are profitable, but they're militarily obsolete, and they're increasingly illegal under international law.

**THE CLIMATE
SOLUTIONS INDUSTRY
NEEDS YOU.**

To survive, humans must make a rapid transition to a green economy. If you want to be part of the solution, the research and development agenda includes improving solar and wind technologies, wave and tidal power, batteries, electric aviation, energy efficient heating, fossil-free industrial processes, and agricultural innovations.

JOBS, MONEY, INFRASTRUCTURE
