

NO MONEY FOR NUCLEAR WEAPONS!

Why do we still live with the threat of nuclear apocalypse?

Follow the money!

The corporations who build nuclear bombs spend millions of dollars lobbying Congress, funding campaigns, sponsoring “deterrence” think tanks, and feeding lies to the media. In return, they get billions of taxpayer dollars (a return on investment reaching up to 1,000%).

BOYCOTT, DIVEST, AND SHAME

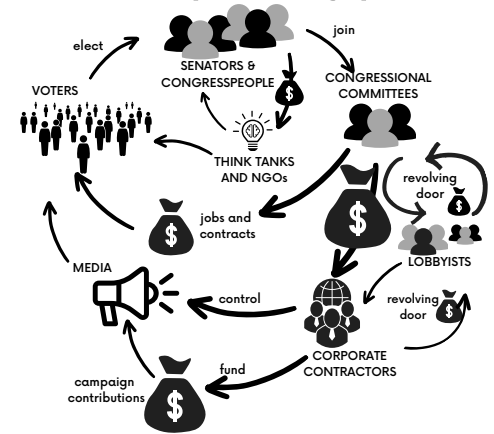

these profiteers until they use their enormous influence over Congress to end our dangerous addiction to nuclear weapons. The future (and their jobs!) is in green technologies, not in militarily obsolete weapons of mass extinction.

Another reason to divest, boycott and shame nuclear weapons contractors

In October 2023, Hamas attacks killed more than a thousand Israelis. Since then, the Israeli Defense Force (IDF) has killed at least 40,000 Palestinians, and almost certainly many more. According to the United Nations, more than two-thirds of all housing in Gaza has been destroyed, along with 84% of health facilities, 80% of schools, and many mosques and other cultural buildings. Palestinians have been left without electricity, clean water, or sufficient food. Disease and malnutrition are rampant. The World Court ordered Israel to prevent actions that could constitute the crime of genocide, but the bombing continues.

Weapons manufacturers thrive on conflict. These companies are complicit with possible genocide.

According to American Friends Service Committee, **Boeing, General Dynamics, L3Harris, Lockheed Martin and RTX (Raytheon)** are some of the major suppliers of weapons to Israel. These weapons are being used by the IDF to target civilians in Gaza.

Legal scholars are concerned that “corporations providing material support to the military, and aware of its foreseeable harmful effects, risk complicity in war crimes, genocide, and other crimes under international law.”
